This application is a continuation in part of U.S. patent application serial no.
09/535,556, filed May 27, 2000, ^{now US Patent No. 6,362,287}

FIELD OF THE INVENTION

25

[0001] The present invention relates to a thermoplastic elastomer composition wherein
a silicone base and a stabilizer are blended with a polyamide resin and a silicone gum
contained in the base is dynamically vulcanized in the mixture.
